

Grid Metals Corp. Receives Drill Permit for Falcon West Cesium Property

September 11, 2025 TORONTO -- Grid Metals Corp. (TSXV:GRDM; OTCQB:MSMGF) ("Grid" or the "Company") is pleased to announce that it has **received an exploration drill permit** from the Province of Manitoba for its **100% owned Falcon West Lithium/Cesium Property**, located approximately 110 km east of Winnipeg, Manitoba. The Company plans to begin drilling at Falcon West in September.

The target at Falcon West is the Lucy South cesium zone that has seen historical drill intercepts with high-grade cesium values largely contained in the mineral pollucite, the preferred feedstock for the cesium chemicals industry. Grid's upcoming drilling will mark the first concerted effort to define a discrete cesium zone at the property.

Cesium is listed as a rare critical metal by both the Canadian and United States governments. The rare metal has only been mined from three deposits globally, and there is currently a global shortfall of cesium feedstock to supply a growing number of applications, including strategic defence applications and next-generation solar panels.

Figure 1 Falcon West Hole ADL24-09: 3.2 m at 4.56% Cs₂O showing pollucite (the cesium host mineral) and spodumene (the lithium host mineral). The hole was drilled by Grid in 2024.

Robin Dunbar, Grid’s CEO & President, stated “Grid believes Falcon West represents a unique opportunity for the company to advance a high-demand and rare critical metals project in southeastern Manitoba, in an area with excellent infrastructure. It is rare to find a critical metals project with such an attractive combination of resource scarcity and demand. Our goal at Falcon West is to define a cesium deposit of importance to the global cesium industry.”

On Behalf of the Board of Grid Metals Corp.

Dr. Dave Peck, P.Geo., the VP Exploration of Grid, is the Qualified Person for purposes of National Instrument 43-101 and has reviewed and approved the technical content of this release.

About Grid Metals Corp.

Grid Metals is focused on exploration and development in southeastern Manitoba with four key projects in the Bird River area.

- 1) The **Makwa Property (Ni-Cu-PGM-Co)**, which is subject to an Option and Joint Venture Agreement with Teck Resources Limited ("Teck"). Teck can earn up to a 70% interest in Makwa by incurring a total of CAD\$17.3 million, comprising project expenditures (CAD\$15.7 million) and cash payments or equity participation (CAD\$1.6 million) with Grid. Makwa is located on the south arm of the Bird River Greenstone Belt.
- 2) The **Mayville Property (Cu-Ni)** is located on the north arm of the Bird River Greenstone Belt. The property is owned subject to a minority interest.
- 3) The **Donner Property (Li-Cs)** is adjacent to the Mayville Property, and Grid owns 75% of the project. Grid announced a cesium purchase agreement with Tanco on February 18, 2025.
- 4) The **Falcon West Property (Li-Cs)** is located 110 km east of Winnipeg along the Trans-Canada highway and contains highly anomalous cesium values in a number of historical drill holes including 2.2 m at 15.0% Cs₂O and 3.2 m at 4.6% Cs₂O.

All of the Company's southeastern Manitoba projects are located on the ancestral lands of the Sagkeeng First Nation with whom the Company maintains an Exploration Agreement.
