

GridMetals

CORP.

**POISED FOR DISCOVERY IN SOUTHEASTERN
MANITOBA**

NOVEMBER 2025

DISCLAIMER

This presentation ("Presentation") is being issued by Grid Metals Corp. (the "Company" or "Grid ") for information purposes only. Reliance on this Presentation for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all of the property or other assets invested.

The Preliminary Economic Assessment (PEA) of the Mayville-Makwa Project dated April 30, 2014 was prepared by Roscoe Postle Associates Inc. (RPA). The PEA includes the use of inferred mineral resources that are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. The study is preliminary in nature and there is no assurance the mining, metal production or cash flow scenarios outlined in this report would ever be realized. Mineral resources are not mineral reserves and do not have demonstrated economic viability.

Cautionary Statements Concerning Forward-Looking Statements

This Presentation contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of the Securities Act (Ontario) (together, "forward-looking statements"). Such forward-looking statements include management's assessment of future plans and operations and are based on current expectations, estimates, projections, assumptions and beliefs, which may prove to be incorrect. Some of the forward-looking statements may be identified by words such as "may", "will", "should", "could", "anticipate", "believe", "expect", "intend", "potential", "continue", "target", "estimate", "proposed", "preliminary" and similar expressions. Such forward-looking statements include, but are not limited to, the Company's plans for its mineral projects in Manitoba, production capacity and timing, mining and processing methods, by-products, product pricing, capital and operating cost estimates, project economics, future plans, the availability of financing, the growth in the electric vehicle market and its impact on the demand for nickel and copper, and future supply of nickel and copper.

By their nature, forward-looking statements involve a number of risks, uncertainties and assumptions that could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements. Such factors include, among others,

risks and uncertainties relating to potential political risks involving the Company's operations in a foreign jurisdiction, uncertainty of production and costs estimates and the potential for unexpected costs and expenses, physical risks inherent in mining operations, currency fluctuations, fluctuations in the price of nickel, copper and other metals, completion of economic evaluations, changes in project parameters as plans continue to be refined, the inability or failure to obtain adequate financing on a timely basis, and other risks and uncertainties, including those described in the most recently filed Company's Management Discussion and Analysis and Material Change Reports filed with the Canadian Securities Administrators and available for public disclosure at www.sedar.com. Forward-looking statements contained in this Presentation regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future. The Company does not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. You should not place undue reliance on forward-looking statements, which speak only as of the date of this Presentation.

Cautionary Note to U.S. Readers Regarding Estimates of Resources

This Presentation uses the terms "measured" and "indicated" mineral resources and "inferred" mineral resources. The Company advises U.S. investors that while these terms are recognized and required by Canadian securities administrators, they are not recognized by the U.S. Securities and Exchange Commission. The estimation of "measured" and "indicated" mineral resources involves greater uncertainty as to their existence and economic feasibility than the estimation of proven and probable reserves. The estimation of "inferred" resources involves far greater uncertainty as to their existence and economic viability than the estimation of other categories of resources. It cannot be assumed that all or any part of a "measured", "indicated" or "inferred" mineral resource will ever be upgraded to a higher category.

Technical information contained in this Presentation has been reviewed by Dave Peck, P.Geo., a Qualified Person under the meaning of National Instrument 43-101. Drill widths noted in presentation are apparent width unless otherwise stated.

GRID METALS HIGHLIGHTS

Poised for Discovery in Southeastern Manitoba – 150 km from Winnipeg

- Two projects, Falcon West cesium project and Makwa Ni-Cu-PGE project, at exploration/discovery stage of The Lassonde Curve.
 - Drilling is ongoing at Falcon West cesium project.
 - Drilling is ongoing at Makwa to test the Pavo Anomaly, a nickel sulfide surface discovery¹.
- Fully funded following closing of \$4 MM financing with a 9.9% strategic investor².
- Successful drilling anticipated to bring significant stock re-rating.

¹See Grid's August 11, 2025 press release titled "Grid Metals Corp. Announces Grassroots Nickel Sulfide Discovery at Makwa" for more information

²See Grid's October 30, 2025 press release titled "Grid Metals Announces Closing of Second Tranche of Strategic Private Placement" for more information

FALCON WEST CESIUM PROJECT

Strategic Critical Metals Project with Global Scarcity

- Extremely rare cesium-bearing pollucite found at the Lucy South pegmatite.
 - Highlights include **2.2m at 15.0% Cs₂O** and **3.0m at 14.0% Cs₂O**.
- Drill program commenced in October to target a globally significant near-surface cesium resource.
 - The phase 1 drill program is expected to test an area of **150m by 40m**. Drill spacing will be ~10m.
- Potential for Falcon West project to address global shortage of cesium feedstock.

CESIUM MARKET OVERVIEW

- Cesium is an extremely rare metal that is defined as a critical mineral by the US and Canada.
- Cesium has diverse applications:
 - Petroleum exploration
 - Nuclear medicine and medical imaging
 - Military (secure communications, satellite navigation, drones, radar and missile systems)
 - Next generation (Perovskite) solar panels
- Pollucite is considered the optimal host mineral for cesium due to its high cesium content (up to 42.6% Cs_2O) and its relative ease of processing.
- Mining only requires crushing and ore-sorting to produce a saleable 15-20% Cs_2O concentrate (no tailings or expensive infrastructure required).

CESIUM MARKET DYNAMICS

- Cesium feedstock is supply constrained.
 - USGS report indicates existing stockpiles feeding the two downstream chemical converters (Sinomine and Albemarle) could be depleted in a few years¹.
- Extremely high-value critical metal.
 - Cesium carbonate currently trades for US\$217,000/t², up ~80% since August 2025 and ~20x the price of lithium carbonate.
- It's hard to find cesium.
 - Only 6 cesium-bearing pollucite deposits are believed to have ever been discovered and **only 3 mines are believed to have ever produced cesium ore**⁴.
 - It is widely believed that only the Tanco mine is currently producing cesium feedstock.

⁴Tanco (producing), Bikita (not producing), Sinclair (not producing), Lilypad (historical 2001 resource), West Joe (2025 resource), and Shaakichiuwaanaan (2025 resource)

FALCON WEST: LUCY SOUTH

- Wireframe modelling suggests the potential for a **flat-lying cesium-bearing zone** at Lucy South that largely sits within 25 m from surface
- The phase 1 drill program is expected to test an area of **145m by 40m**. The target area remains open in multiple directions.
- Historical high-grade cesium intercepts largely **contained in pollucite**, the preferred feedstock for cesium chemical production.

MAKWA: TECK-FUNDED NICKEL DISCOVERY

- On December 12, 2024, Grid signed an option & joint venture agreement with Teck Resources to explore for Tier 1 nickel/copper deposits on the Makwa Ni-Cu-PGE project¹.
 - Teck can earn up to a 70% interest in Makwa by incurring a total of CAD\$17.3 million.
- In the summer of 2025, Grid announced a **nickel sulfide surface discovery** called the “Pavo Anomaly”².
 - The target model is an Eagle’s Nest-type sulfide deposit. Noront Resource, which owned the Eagle’s Nest deposit, was acquired by Wyloo for C\$617 million in 2022.
 - The Pavo Anomaly is a large electromagnetic (“EM”) conductor with a strike length of 600 m in east-west extent with 1.1% nickel hosted by semi-massive magmatic sulfide mineralization.
 - The drill has been mobilized to site for a **2,500 m drill program** that is **expected to be completed before year-end**.

Pyrrhotite +/- pentlandite with lesser pyrite and minor chalcopyrite from “Pavo”

¹See Grid’s December 12, 2024 press release titled “Grid Metals Corp. Signs Agreement with a Major Mining Company to Fund the Makwa Nickel Project” for more information

²See Grid’s August 11, 2025 press release titled “Grid Metals Corp. Announces Grassroots Nickel Sulfide Discovery at Makwa” for more information

MAKWA: EXPLORATION OVERVIEW

- Grid consolidated the belt in 2023 with very limited deep drilling to date.
- Widespread mineralization with high-grade occurrences throughout the whole belt (e.g. 0.9m at 10.9% Ni, 9.7% Zn, and 0.9% Cu at the Ore Fault deposit and 19.3% Cu grab sample from Cup Anderson showing)
- Teck initiative led to the Pavo discovery.
- Teck's focus is the discovery of high-grade, high-value deposits of global significance.

SENIOR MANAGEMENT

ROBIN DUNBAR

President, CEO, and Director

- Mr. Dunbar holds an M.B.A. from Dalhousie University
- Over 25 years of experience in critical minerals exploration and management
- Current director of McEwen Mining and a Director of Western Areas Ltd. (ASX: WSA) from 2005-2015

DR. DAVE PECK

VP Exploration and Business Development

- Former VP Exploration for North American Palladium Ltd. prior to acquisition by Impala Platinum
- Former Global Nickel Commodity Leader for Anglo American PLC's Nickel Exploration Division
- PhD. in Geology from Melbourne University, Victoria, Australia

BRANDON SMITH

Chief Development Officer

- Over 15 years of experience in capital markets
- Former lead equity research analyst covering battery metals developers at Cormark Securities Inc.
- Masters of Financial Economics from the University of Toronto and CFA charterholder

ARIF SHIVJI

Chief Financial Officer

- Mr Shivji is a seasoned financial professional experienced in financial management and public company reporting.
- He has 27 years of related work experience.

BOARD

TOM MEREDITH

- 30 years experience in the junior mining industry
- Chairman of West Red Lake Gold Mines
- Former President and CEO of Lexam VG Gold

CONSTANTINE KARAYANNOPOULOS

- Professional engineer
- Has held senior positions, including as Director, President, and CEO, at Neo and its predecessor companies for more than 20 years.
- Chairman of Neo Lithium from 2016-2022 when it was acquired for ~C\$960 million.

PATRICK MURPHY

- Managing director at the specialist natural resources group AMCI
- Experienced mining investment professional
- Holds board positions for several AMCI companies including Green Technology Metals (ASX:GT1)

GRANT MCADAM

- Investment analyst at Waratah Capital Advisors since 2019 focused on metals and mining, real estate, business and information services and special situations
- He was an investment analyst at a Canadian Insurance Company prior to joining Waratah

GRID METALS SUMMARY

- ✓ Significant re-rate potential with two upcoming drill programs (cesium drilling at Falcon West and Teck-funded Ni-Cu drilling at Makwa)
- ✓ Fully funded with upcoming cornerstone 9.9% investment from a strategic investor
- ✓ Geographically focused developer with synergies in permitting, First Nations engagement, and exploration infrastructure
- ✓ Tier-1 jurisdiction with excellent First Nations relationships

APPENDIX – MANITOBA

A PREMIER MINING JURISDICTION

Manitoba: An Established Critical Metals Producer

- Manitoba currently exports lithium, nickel, and copper concentrates and has a long mining history (Thompson Nickel belt, Snow Lake VMS belt, and others).

Excellent Infrastructure with High ESG Credentials

- Over 97% of the Manitoba power grid is generated from green hydroelectric power. Grid Metals' focus projects are close to existing paved roads, rail, and powerlines.

Defined Critical Minerals Strategy

- On July 25, 2023, Manitoba released a Critical Minerals Strategy that strongly supports responsible mineral development.

APPENDIX – MAKWA AND MAYVILLE

OVERVIEW

- **Makwa**
 - Poised for Tier-1 nickel sulfide discovery with Option & Joint Venture agreement with Teck.
- **Mayville**
 - Eagle drill program confirmed widespread disseminated copper mineralization, located ~10 km from the Mayville deposit (32 MMt at 0.61% CuEq*)
- Mayville (north arm) and Makwa (south arm) properties cover ~50 km of prospective strike length
- Multiple deposits and many untested high grade occurrences
- Low project carrying costs
- Exploration agreement in place with Sagkeeng First Nation

*MM Mineral Resource Estimate (MRE) has an effective date of December 31, 2023. The Qualified Persons for the MRE are Messrs. Alan J. San Martin, MAusIMM(CP) and Charley Murahwi, P.Geo. from Micon International Limited.

APPENDIX: TECK OPTION & JV DETAILS

- The Agreement grants Teck a two-stage option to acquire up to a 70% interest in Makwa by funding cumulative expenditures of CAD\$15,700,000 and making staged cash payments of CAD\$1,600,000 to Grid (CAD\$1,000,000 can be completed through a subscription of shares at Teck's election).
- The First Option cash and expenditure schedules are shown below for Teck to earn a 51% interest in Makwa:

On or Before	Annual Expenditures
May 31, 2025	\$450,000
May 31, 2026	\$1,500,000
May 31, 2027	\$1,750,000
May 31, 2028	\$2,000,000

On or Before	Cash Payments
Jan 31, 2025	\$400,000
Jan 31, 2026	\$100,000
Jan 31, 2027	\$100,000

- If Teck exercises the First Option, Teck can earn an additional 19% interest in the Property (the "Second Option") by incurring a further CAD\$10,000,000 in exploration expenditures over a period of three years and making a payment of CAD\$1,000,000 in cash or subscription for Grid shares (at a 25% premium to VWAP)

APPENDIX - MAKWA DEPOSIT

Classification (Cut-Off Grade)	Category	Resource	Grade							Contained Metal					
MAKWA		MMt	% NiEq	% Cu	% Ni	% Co	g/t Pd	g/t Pt	g/t Au	MMlbs Cu	MMlbs Ni	MMlbs Co	Koz Pd	Koz Pt	Koz Au
Open Pit (0.3% NiEq)	Indicated	14.22	0.75%	0.11%	0.48%	0.02%	0.37	0.10	-	34.5	150.5	6.3	169.1	45.7	-
	Inferred	0.02	0.36%	0.04%	0.23%	0.01%	0.11	0.04	-	-	-	-	-	-	-
Underground (0.84% NiEq)	Indicated	0.50	1.11%	0.11%	0.77%	0.02%	0.67	0.19	-	1.2	8.5	0.2	10.8	3.0	-
	Inferred	-	-	-	-	-	-	-	-	-	-	-	-	-	-

HIGHLIGHTS

- Pit-constrained indicated resource of 14.2 MMt grading 0.75% NiEq with strip ratio of 4.7:1
- Mineralization continues under pit resource
- 73.8% nickel recovery from the 2014 PEA*
- Historical intercepts include 18.7 m at 1.8% Ni, 24.7 m at 1.8% Ni, and 16.5 m at 1.7% Ni, 1.8 g/t Pd

* The Preliminary Economic Assessment (PEA) of the Mayville-Makwa Project dated April 30, 2014 was prepared by Roscoe Postle Associates Inc. (RPA). The qualified persons are Stuart E. Collins (P.E.), Reno Pressacco (M.Sc (A.), P.Geo.), David Ross (M.Sc., P.Geo.), Hugo Miranda (MBA, C.P.), and Holger Krutzelmann (P.Eng.)

APPENDIX - MAYVILLE DEPOSIT

Classification (Cut-Off Grade)	Category	Resource	Grade							Contained Metal					
MAYVILLE		MMt	% CuEq	% Cu	% Ni	% Co	g/t Pd	g/t Pt	g/t Au	MMlbs Cu	MMlbs Ni	MMlbs Co	Koz Pd	Koz Pt	Koz Au
Open Pit (0.3% CuEq)	Indicated	32.02	0.61%	0.40%	0.16%	0.01%	0.13	0.05	0.05	282.4	112.9	7.1	133.8	51.4	51.4
	Inferred	-	-	-	-	-	-	-	-	-	-	-	-	-	-
Underground (1.37% CuEq)	Indicated	0.32	1.62%	0.96%	0.37%	0.02%	0.19	0.08	0.11	6.8	2.6	0.1	2.0	0.8	1.1
	Inferred	0.20	1.50%	0.96%	0.32%	0.02%	0.16	0.08	0.11	-	-	-	-	-	-

HIGHLIGHTS

- Pit-constrained indicated resource of 32 MMt grading 0.61% CuEq with favorable strip ratio of 3.2:1
- Metallurgy indicates excellent copper recoveries of 87% to high grade copper concentrate (28%)
- Nickel recoveries range from 50% to 68% to 10% nickel concentrate
- Palladium high-grade discovery in footwall requires follow up with potential to add tonnage
- Historical intercepts include 26.4 m at 1.21% Cu, 0.38% Ni and 64.3 m at 0.51% Cu, 0.24% Ni

Deposit Long Section, looking north

APPENDIX – MAYVILLE

Numerous shallow, high potential massive sulfide targets have yet to be tested across the property

Conductor anomalies associated with 3 interpreted feeder structure are of immediate interest

APPENDIX – MAYVILLE

2024 EAGLE GABBRO DRILL PROGRAM

- A copper-rich magmatic sulfide zone averaging 20-30 meters in width was intersected at two separate areas located 400 m apart at the southern end of the target trend (New Manitoba and E15).
- Highlights include **25.0 m at 1.47% CuEq** in hole EAG24-06 at New Manitoba and **20.0 m at 0.99% CuEq** in hole EAG24-01 at E15.
- Early indications are encouraging for the continuation of the mineralized zone along strike to the northwest.

APPENDIX - ADDITIONAL DEPOSITS

ACQUIRED BY GRID IN 2023

- Grid Metals acquired ground adjacent to its Mayville and Makwa project in 2023 containing ~7 MMt of resources*:
 - Page:** 1.5 MMt grading 0.32% Ni and 0.13% Cu (indicated)**
 - Ore Fault:** 0.9 MMt grading 0.32% Ni and 0.24% Cu (indicated) and 2.5 MMt grading 0.35% Ni and 0.19% Cu (inferred)**
 - New Manitoba:** 1.8 MMt grading 0.75% Cu and 0.33% Ni (historical)***
- Page and Ore Fault are direct analogues to the Makwa deposit and host high-grade drill intersections including 6.5m with 1.65% Ni and 0.68% Cu (Page) and 4.0m with 1.49% Ni, 0.36% Cu and 2.7 g/t Pd+Pt+Au (Ore Fault)
- New Manitoba sits ~9 km from the Mayville deposit, and the deposit remains open along strike and at depth.

* See April 13, 2023 press release titled "Grid Metals Corp. To Acquire Nickel Copper PGM Assets Consolidates Key Base Metal Land Position Bird River Belt" for more information

** The resource estimates cited above are sourced from a 43-101 Technical Report published by Marathon PGM Corporation and P&E Mining Consultants Inc. and dated Feb. 26, 2009.

*** Manitoba Mineral Inventory Card #217). Note: The Company has not been able to verify the historical estimate as relevant and the historical estimate should not be relied on

APPENDIX - DONNER

MAIDEN LITHIUM MINERAL RESOURCE (JULY 2023)

Classification (Cut-Off Grade)	Deposit	Inferred Resource (tonnes)	Grade (% Li ₂ O)
Open Pit (0.3% Li ₂ O)	Main Dyke	1,145,000	1.48%
	NW Dyke	955,000	1.36%
	Total	2,100,000	1.42%
Underground (0.5% Li ₂ O)	Main Dyke	3,669,000	1.45%
	NW Dyke	1,042,000	1.11%
	Total	4,710,000	1.37%
GLOBAL	Main Dyke	4,814,000	1.46%
	NW Dyke	1,997,000	1.23%
	Total	6,810,000	1.39%

1. The Mineral Resource Estimate (MRE) has an effective date of the 27th June, 2023. The Qualified Person for the MRE is Mr. Rohan Millar, P.Geo. an employee of SGS.
2. The classification of the current Mineral Resource Estimate into Inferred Resource is consistent with current 2014 CIM Definition Standards - For Mineral Resources and Mineral Reserves.
3. All figures are rounded to reflect the relative accuracy of the estimate and numbers may not add due to rounding.
4. All Resources are presented undiluted and in situ, constrained by continuous 3D wireframe models, and are considered to have reasonable prospects for eventual economic extraction.
5. Mineral resources which are not mineral reserves do not have demonstrated economic viability. An Inferred Mineral Resource has a lower level of confidence than that applying to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.

APPENDIX – PERMITTING IN MANITOBA

PERMITTING PATH: REED MINE PERMITTING HISTORY

The Reed Mine provides a great roadmap of a standalone mining project that advanced rapidly through the Manitoba permitting process.

The high-grade copper pod was mined from 2014 to 2018 with the ore being trucked 120 km to HudBay's Flin Flon mill.

Grid can leverage the same legal, environmental, and permitting consultants that worked on the Reed mine.

APPENDIX - NORTHERN MELS

NORTHERN MANITOBA EXPLORATION LICENSES (“MELs”)

- Grid's greenfield nickel/copper exploration projects are located in northern Manitoba
- Extensive historical data for Fox River Belt has been compiled and interpreted using the Raglan model
- Recently completed deep penetrating EM survey on Fox River has identified several new targets
- All projects have excellent drill ready targets and known surface Ni-Cu-PGE mineralization
- Critical hands-on exploration experience on all 3 projects resides with Grid.
